EXAMINER'S AMENDMENT ATTACHMENT  
CLAIMS  
10/623,885

1. An electric generating convertible bicycle, comprising:

a conventional bicycle of the type having a plurality of gears that can be varied by a rider during use of said bicycle;

a generator having a shaft and a roller operatively attached to said shaft, said roller adapted for frictional engagement with an outer circumferential surface of a rear tire of said bicycle; and

means for maintaining said roller in frictional engagement with said ~~with said~~ outer circumferential surface.

M.F.  
3/3/05

2. The electric generating convertible bicycle of claim 1 wherein said means for maintaining includes a stand, said stand adapted to cooperate with an axle of a rear wheel of said bicycle sufficient to retain said rear wheel thereto and wherein said rear tire is elevated above a surface said stand is adapted to be placed on and wherein said stand includes a first and a second upright member and wherein
